

Nabovarme

DIY Central Heating Infrastructure

Nabovarme is a word for community heating

Pellet heating systems in Christiania

Large red dots:
major systems

Small orange dots:
some of many independent units

History of heaters

Kamstrup Multical 602 - first to be reverse engineered

Communities with Communities inside

Christiania - an old army base

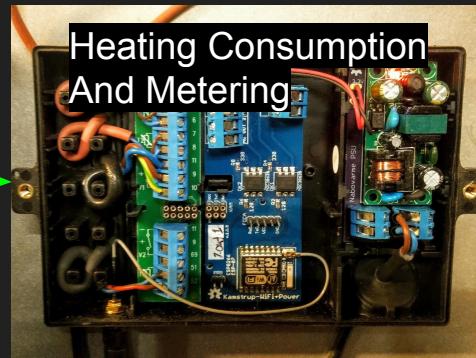

Christiania today

- 46 year old squatted area
- 900 inhabitants
- 265 houses
- 24 hectares land
- 1 km from Danish parliament

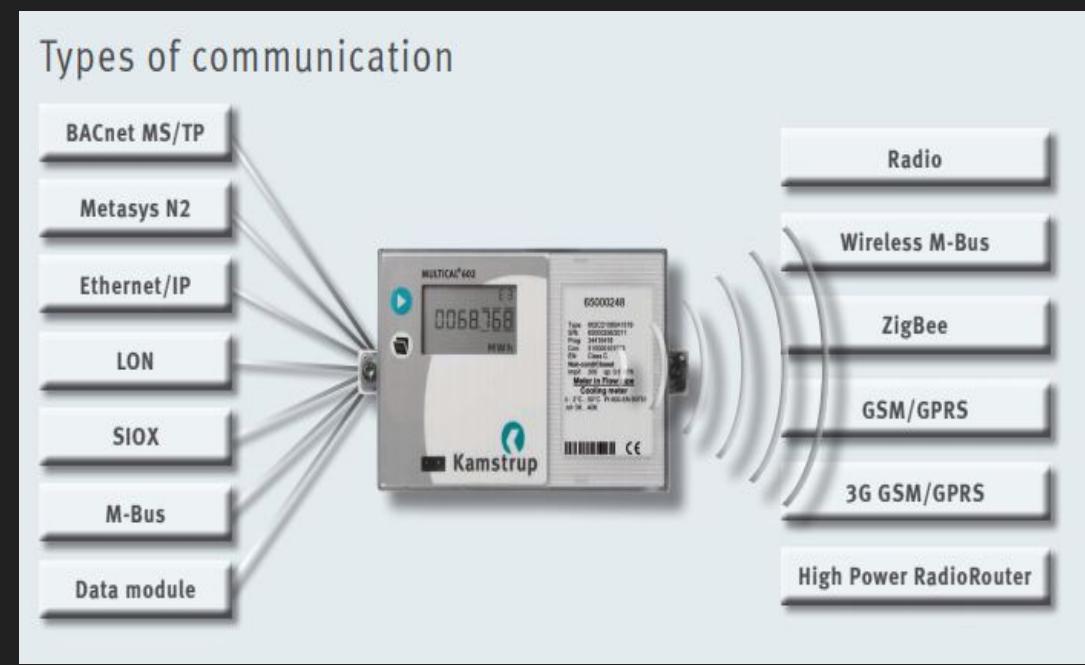

What is Nabovarme?

Kamstrup solutions

- No WIFI option - requires additional infrastructure
- No open software to receive data
- Enterprise

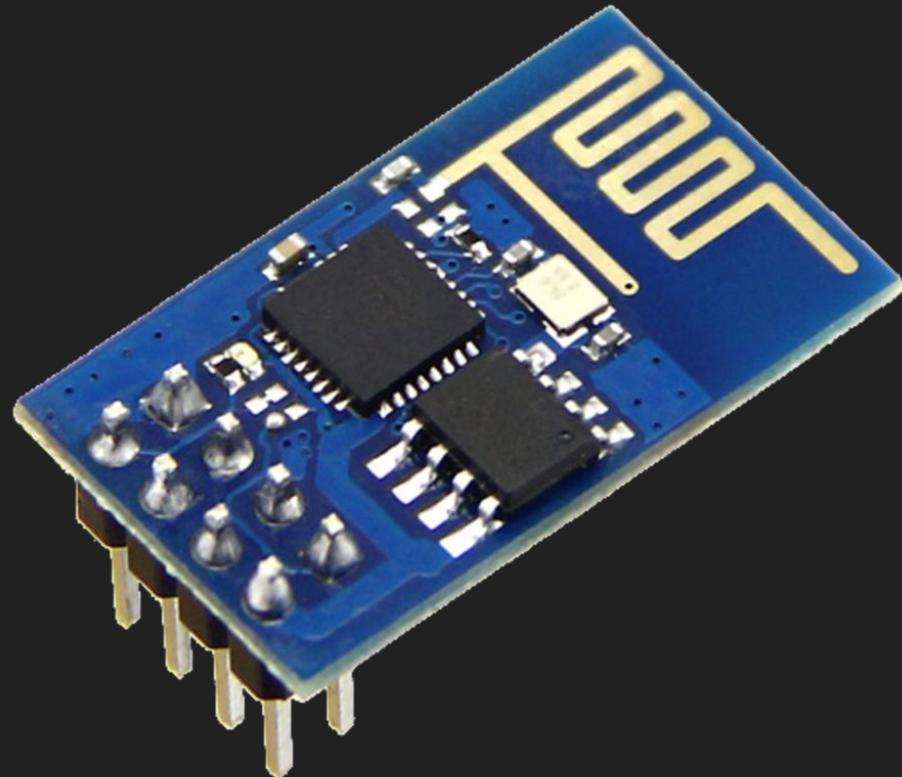

Nabovarme users share their WIFI

- 350+ users
- 150'000€ worth or wood burned yearly
- Huge diversity in income, social class, heritage etc.
- Low level of interest in heating

ESP8266 - Microcontroller with wifi for 1\$

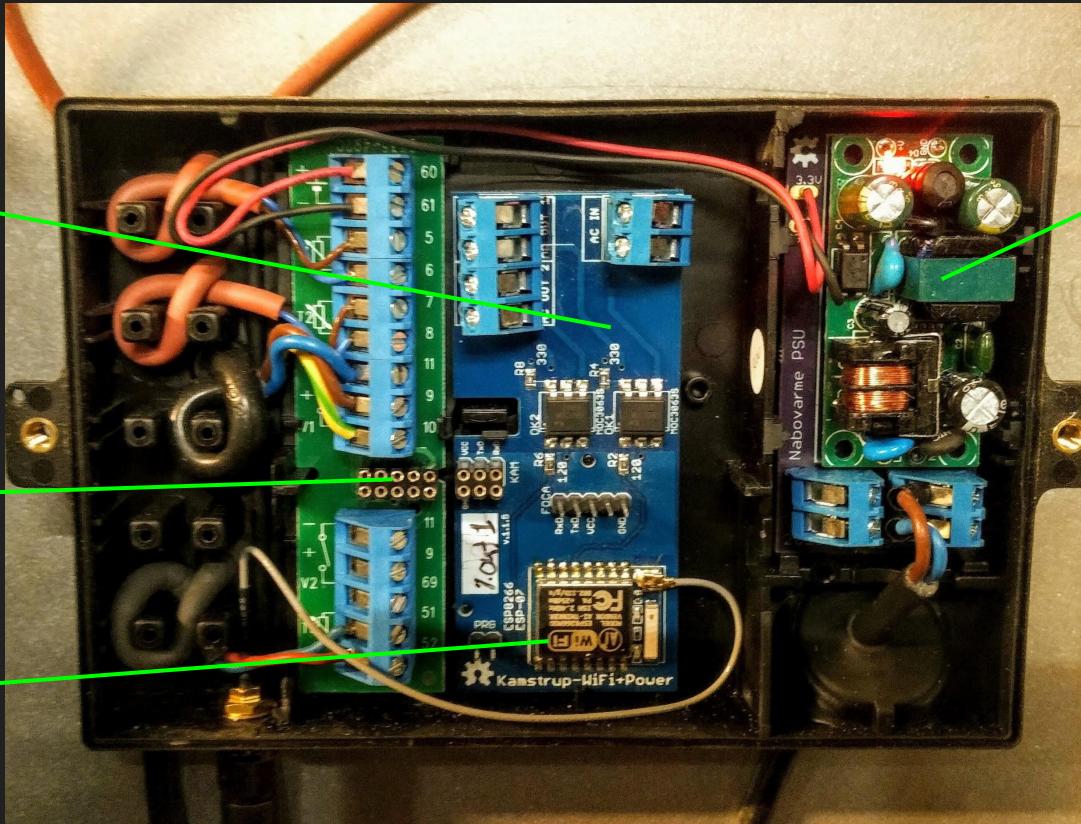

MeterLogger Hardware

MeterLogger PCB

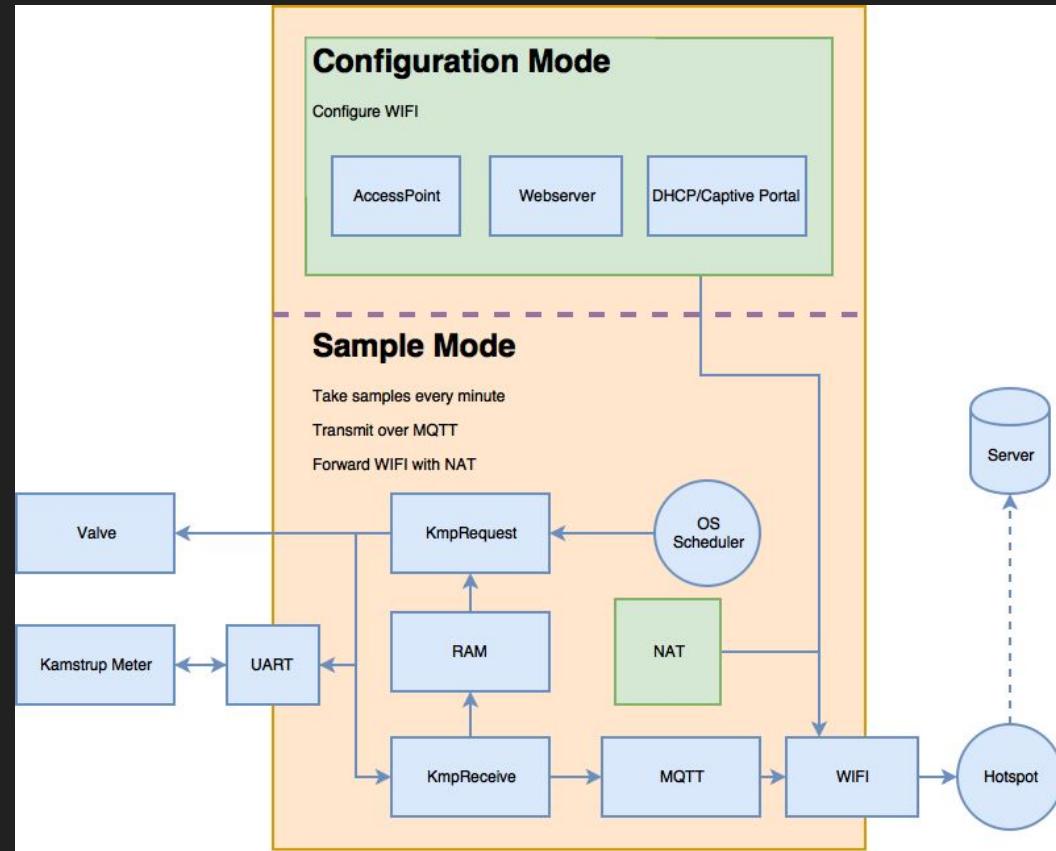

Kamstrup Connector

ESP8266

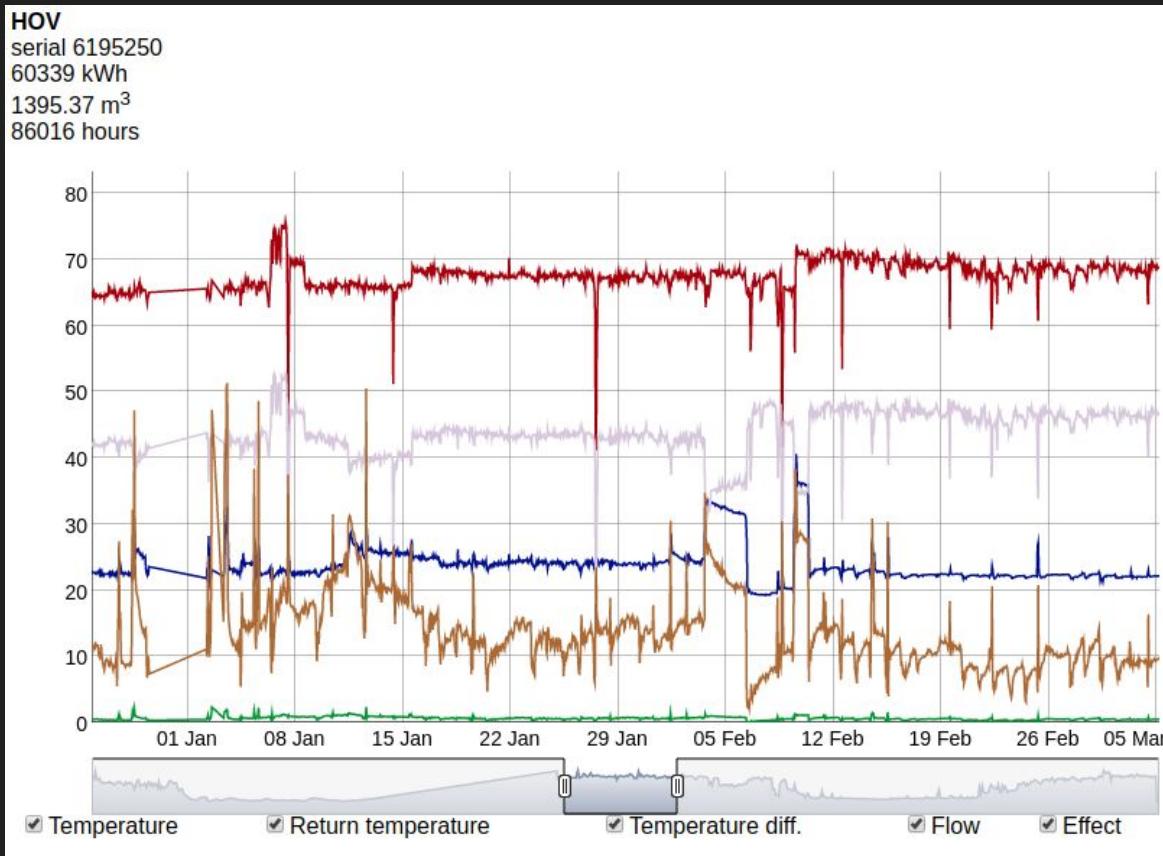

MeterLogger PSU

Meterlogger Firmware

We need your help!

- Stoffer IS our busfactor, run him down and hundreds of people loose their heating
- We need security on our samples
- We need a scalable billing system
